Foxes: Facts & Pictures - Live Science A fox's diet can consist of small animals, such as lizards, voles, rats, mice, rabbits and hares. They round out their diet with birds, fruits and bugs, according to the Smithsonian . Foxes that live near the ocean eat fish and crabs, as well. Red Fox Information, Photos, and Facts - American Expedition Red Foxes mate in the winter and the female fox gives birth to a litter of 2-12 kits in the spring. The kits are dark gray in color at the time of birth, but grow a new coat within a month. Both the male and female fox cares for the kits until they are ready to leave in the fall. Red Fox - Animal Facts, Education & Inspiration Amazing Facts About the Red Fox. A fox's den is normally a burrow underground, also known as an earth den, but they can also live above ground in a cosy hollow. While they are solitary animals, during breeding season (winter) when they court and mate, the dog fox will support the female (vixen) by bringing food for the family (early spring).

What Is a Fox's Shelter? | Animals - mom.me Red foxes, bat-eared foxes (*Otocyon megalotis*) and kit foxes, for example, are all avid den residents. While gray foxes occasionally find shelter underground in dens, they don't do so as often as some other types of foxes, including red foxes. Fennec Fox | National Geographic - Animals Fennec foxes are opportunistic eaters. They forage for plants but also eat rodents, eggs, reptiles, and insects. Like most desert dwellers, the fennec fox has developed the ability to go for long periods without water. Fox Facts, Habitat Information & Worksheets For Kids Foxes are excellent tree climbers, and they mark their territory by the scent of urine. They also hunt like a cat. They stalk their prey just like cats. They often play with their prey before they kill it. Foxes hunt mainly at night because they are nocturnal animals. Foxes live all over North America.

14 Fascinating Facts About Foxes | Mental Floss They're medium-sized, between 7 and 15 pounds, with pointy faces, lithe frames, and bushy tails. But unlike their relatives, foxes are not pack animals. When raising their young, they live in small families called a "leash of foxes" or a "skulk of foxes" in underground burrows. Otherwise, they hunt and sleep alone.
