When. Fragmented Child: Disorganized Attachment and Dissociation Underlying all of these symptoms is a tendency for the child to separate parts of themselves, or "fragmentation."™ This fragmentation is often the result of already experienced trauma.

Bone fracture - Wikipedia A bone fracture is a medical condition in which there is a partial or complete break in the continuity of the bone. In more severe cases, the bone may be broken into several pieces. A bone fracture may be the result of high force impact or stress, or a minimal trauma injury as a result of certain medical conditions that weaken the bones, such as osteoporosis, osteopenia, bone cancer, or osteogenesis imperfecta, where the fracture is then properly termed a pathologic fracture.
